Shadman Colony, House # 786, Gujrat, Pakistan

SUMMARY

Senior Software Engineer with 4+ years of experience in full-stack development, backend engineering, API design, cloud integration and production level LLM integration. Proficient in Python, Django, Flask, FastAPI, Celery, React, Next.js, and TypeScript, with strong expertise in REST APIs, MySQL, PostgreSQL, NoSQL databases, and Redis. Experienced in building scalable applications, integrating third-party services such as Stripe, and implementing authentication using OAuth. Skilled in DevOps, Docker, CI/CD automation, GitHub Actions, Azure DevOps, and cloud platforms including AWS, GCP, and Azure. Experienced in LLM integration, LangChain, NLP, and system monitoring using the ELK Stack.

SKILLS

Python	REST API	Git	React JS
Django	HTML	GitHub	Next JS
Flask	Docker	GCP	OpenAI
FASTAPI	Redis	Azure DevOps	Claude
Celery	DevOps	ELK	
MySQL	AWS	LLM Integration	
PostgreSQL	Langchain	CI/CD	
NoSQL	NLP	GitHub Actions	
	JavaScript	OAuth	
	Stripe	Typescript	

PROFESSIONAL EXPERIENCE

True Meridian (Islamabad)

Senior Python Developer **APR 2024-Present**

- Built and maintained backend services using Django and FastAPI, supporting production workloads with improved stability and scalable architecture capable of handling increasing traffic demands.
- Designed and integrated LLM-powered services into backend system improving system efficiency and scalability.
- Designed and developed microservices-based architectures for distributed systems, improving scalability, fault isolation, and maintainability across backend services.

Codeaza Technologies (Rawalpindi)

JAN 2022 – APR 2024

Backend Lead → Senior Python Developer → Junior Python Developer

- Led a team of 3–6 developers, managing task allocation, sprint planning, code reviews, and project execution, improving delivery efficiency by approximately 20–30%.
- Designed, developed, and optimized scalable backend systems and RESTful APIs using Python, Flask, and Django, improving API response times by up to 40% through query optimization and database indexing.
- Implemented secure authentication and authorization mechanisms using OAuth 2.0 and JWT, ensuring secure access to APIs and third-party integrations.
- Built and maintained backend services following REST API design best practices, improving system reliability, maintainability, and integration across frontend and external services.
- Deployed and maintained applications on AWS, Google Cloud Platform (GCP), Heroku, and VPS environments.
- Developed clean, scalable, and maintainable backend solutions while following Python best practices, reducing integration issues and improving developer onboarding.
- Collaborated with cross-functional teams to deliver high-quality software within project timelines while maintaining code quality through testing, documentation, and code reviews.

EDUCATION & CERTIFICATIONS

Bachelors in Science
Majors: Computer Science
Bahria University, Islamabad
